FAISAL L. MOHAMMAD

Bachelor of Science in Computer Science Student

Calamba City, Laguna, Philippines • faisallumna07@gmail.com • 09934087398

PROFESSIONAL SUMMARY

Dedicated third-year Bachelor of Science in Computer Science student at City College of Calamba with a strong academic foundation in software engineering, data mining, and artificial intelligence application development. Experienced in building AI-powered diagnostic mobile applications utilizing YOLOv11, simulation games via Godot Engine, and full-stack web projects. Accomplished technical practitioner specializing in digital video production, motion graphics, and editorial graphic design.

EDUCATION

Bachelor of Science in Computer Science (In Progress — Expected Graduation: 2028)

City College of Calamba, Laguna, Philippines | Third Year (2026–2027)

Relevant Coursework: Operating Systems, Data Mining, Software Engineering, Computer Architecture, Systems Analysis, and Formal Language Theory.

CREDENTIALS & TRAINING

Mechatronics Servicing NC II Passer | Technical Education and Skills Development Authority (TESDA)

• Demonstrated technical proficiency in hardware systems, industrial automation, and operational troubleshooting.

Professional & Interpersonal Skills Certification | Wadhwani Skilling

• Completed comprehensive professional training emphasizing workplace communication, professional etiquette, and interpersonal collaboration (November 2024).

TECHNICAL & CREATIVE SKILLS

• **Programming & Development:** Python, GDScript, HTML5, CSS3, JavaScript

• **Artificial Intelligence & Data Science:** YOLOv11 (Object Detection & Triage Classification), Orange Data Mining, Machine Learning Model Evaluation

• **Software & Frameworks:** Godot Engine, GitHub, GitHub Actions (CI/CD), Adobe Illustrator, CorelDraw, GIMP

• **Digital Media & Production:** Professional Video Editing, Motion Graphics, Editorial Magazine Layout Design

KEY ACADEMIC & PERSONAL PROJECTS

FeliVet Insight — AI-Powered Mobile Application

• Developing an intelligent mobile application leveraging YOLOv11 with triage classification to detect feline skin diseases (ringworm, scabies, flea allergy dermatitis) using a structured dataset split.

SCHED.EXE — CPU Scheduling Simulation Game

• Engineered an educational 2D lane-based strategy game using Godot Engine and GDScript to simulate operating system CPU scheduling algorithms for academic coursework.

Brew Haven Café & SQA Report — Web Development & Quality Assurance

• Designed and deployed a functional coffee shop landing page on GitHub Pages with automated CI/CD workflows, accompanied by a rigorous Software Quality Assurance inspection report.

Student Attrition & Stress Analysis — Data Mining Workflow

• Conducted exploratory machine learning evaluations and comparative classifications (Random Forest, SVM, Gradient Boosting) in Orange Data Mining.
